# RAVAS Data Collector (RDC)

Transfer data from the RAVAS indicator to PC or server

750 kg

ID, Weight, Date/Time

- Operator is pushing weight data recordings over Wi-Fi to PC where RDC software is installed

- Received data recordings are stored in a CSV file

- Data integrity is guaranteed through a checksum

- When RAVAS indicator is out of a Wi-Fi signal range the data recordings are stored on the device (data memory: 3200 indicator 8 records, 5200 indicator 800 records)

- Automatic data transfer of stored recordings starts the moment the RAVAS indicator has a Wi-Fi signal

- Good display of feedback information to operator

- Secured Wi-Fi connection through WPA & WPA2 PSK security

- Indicator 3200 sends Gross, Net, Tare, ID code product, ID code indicator, Date & time

- Indicator 5200 sends the same data output + max 4 configurable product codes

- Both indicators can send alibi numbers as well, when scales are used in Legal For Trade mode
