

RAVAS Indicator App

Connect with your RAVAS weighing system

Get data instantly on your smartphone or tablet!

The RAVAS Indicator App is designed to collect data efficiently from RAVAS weighing systems. Whether used as a stand-alone solution or integrated with RAVAS RDC software, the RAVAS Indicator app offers flexibility to suit your operational needs.

Streamlining weighing and labeling processes, helps you save time and reduce errors, boosting your overall productivity.

The free version of the RAVAS Indicator App for Android* smartphones and tablets has standard functionality and is available from Google Play store. Upgrade your experience by unlocking premium features like display QR- or barcode, direct print, and create your own custom labels with a 1 or 5 year license period.

The RAVAS Indicator App works with the RAVAS 3200 and 5200 indicators as well with RAVAS RedBox connectivity.

* Version 10 and newer

Intuitive Design

Easy data collection

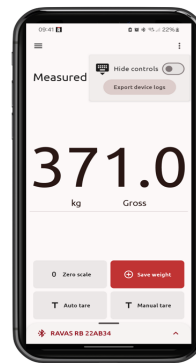

How? Connect the RAVAS Indicator App with the RAVAS indicator via wireless connectivity. The weight can be seen directly on the screen of your smartphone or tablet with controls over setting zero, applying tare weight and saving the weight along with any custom field defined.

The saved weight data are stored locally on your smartphone or tablet and can be viewed anytime. The complete data can be sent by email to a PC as a CSV-file using WLAN or 3/4/5G.
